SEASONS**

A Church of England service will be held in the School next Sunday, at 7:30 p. m.

Mr. Bruce Hutchison is a Calgary visitor this week.

Mr. Ken Gulleckson returned Wednesday, after having taken Mrs. Gulleckson to the Hospital where she underwent an operation for appendicitis.

Mrs. A Thorsrud who spent the past month, visiting at the home of her parents, Mr and Mrs. H R. King, left for her home Thursday.

After having had weeks of bright summer-like weather it suddenly turned cold on Wednesday, at Sibbald the ground is covered with snow. We hope it's not winter yet,

Cumulative Seventh Loan total \$575,813,500 compared with \$553,617,550 in Sixth Loan. Yesterdays sales \$74,343,750 against \$72,373,500 last Loan.

Campbell, Carroll National News Desk

Farewell Party Held For Mr. and Mrs. Targett.

On Wednesday evening a large number of the residents of Chinook and district gathered at the School to bid farewell to Mr. and Mrs. E. H. Targett who are leaving shortly for Irma, Alta. Mr. Targett has been the C. N. R. Agent for the past 6 years, and has been transferred to that town.

The evening was pleasantly spent in playing whist and other games. After the lunch period, Mr. L. D. Butts presented Mr. and Mrs. Targett with useful gifts, Mr. Butts expressed the regret of the community at their departure, and that the gifts would be a reminder of the appreciation of the work they had done in both the social and religious life of the district. Mr. Targett in thanking the gathering, said they were sorry to leave Chinook and would have pleasant memories of their residence here. The chairman then called on other speakers, Mr. Warren then voiced the appreciation of the work Mr. and Mrs. Targett had done in the interest of the Red Cross, and the loss the Chinook Branch of the Red Cross had sustained in their departure.

Wishing them health and happiness in their new location

U. F. A. CO-OP.

CANADA'S VETERANS Their Post-War Opportunities

This is the Fifth in a series of advertisements to inform the people of Canada of plans to re-establish men and women of the armed forces. To get full details, save and read every advertisement.

For complete information, write for the booklet, "Back to Civil Life."

Care for the Wounded and Ill — CANADA'S TREATMENT AND PENSION LEGISLATION

Canada has assumed as a minimum obligation to members of the armed forces that before their return to civil life, the fullest possible measures shall be taken towards physical fitness, and that pension shall be provided for any permanent disability due to service. Full medical service is provided and permanent hospitals have been established from coast to coast. Equipment for the most modern types of treatment has been installed, and leading specialists in all branches of medicine and surgery have willingly placed their services at the disposal of veterans.

There is free treatment with allowances to every discharged person for the first year after return to civil life and free treatment with allowances for pensioned conditions is available throughout the pensioner's life.

Those discharged from the forces unable to work and in need of continuing treatment may have their pay and allowances of rank continued for one year, if necessary, and for longer when treatment is still required for a pensionable condition.

PENSIONS

Pension is awardable under three simple and easily understood conditions:

1. When the veteran has served in a theatre of war, death or any permanent disability not due to misconduct is pensionable.
2. (a) When the veteran has served in Canada only, death or disability caused by service is pensionable.
- (b) Death or serious disability not due to service may be pensionable if hardship would otherwise result.

JOBS FOR DISABLED

A very wide program of education is being carried on continuously so that veterans who suffer a disability as a result of their war service may have a full and happy future. Many volunteer associations are assisting in this work, while specialized help is available from such organizations as the War Amputee, the Canadian National Institute for the Blind, and the Canadian Society for the Deaf and Hard of Hearing.

THE COMMUNITY'S RESPONSIBILITY

This series of advertisements has given, in brief form, an outline of the Canadian re-establishment program for ex-service men and women. The responsibility, however, is not entirely that of Parliament. It can provide legislation and funds but in the final analysis it must be the veterans themselves and the people of Canada who make the program work. The public support so far has been unstinted, but successful administration requires further public support. Understanding and effort by the whole people are needed.

VETERANS' WELFARE OFFICERS ARE STATIONED IN KEY CENTRES THROUGHOUT CANADA. THEY ADVISE AND ASSIST EX-SERVICE PERSONNEL, AND SHOULD BE CONSULTED ON ALL PROBLEMS.

Issued under the authority of Hon. J. A. MacKenzie, Minister of

VETERANS' AFFAIRS

Winnipeg, Manitoba

The Quick and the Dead

Ordinarily, it is not difficult to distinguish between a dead animal and one that is alive. With plants it is different. Under conditions of severe drought, the grass in a meadow or lawn may look dead; but only a day or two after rain it is obviously very much alive. Seeds show no signs of life until they are provided with conditions favourable to germination, and sometimes they may be alive, but dormant, and refuse to germinate even under apparently favourable circumstances.

When harvest weather is here, and in the absence of damage by diseases or insects, field crop seeds are usually alive. This fall, harvesting conditions have been very bad, in many districts, and frost has undoubtedly damaged a good deal of grain. Most farmers, therefore, will be wise to make a germination test or have one made.

Lino Elevator company agents can provide printed cards giving detailed instructions for making tests at home. They will, also, accept samples of wheat, oats, barley, rye and flax for testing in our laboratory. First class equipment and a skilled staff are at your service. Official government tests are made, for a nominal fee, at Plant Products Division, Laboratories at Calgary, Saskatoon and Winnipeg. Poor stands of grain are an invitation to weeds. Take no chances; but either make a test or have one made.

OUR COMPLETE SHORT STORY—

Maggie Rebels

By EDITH LOVELL

McClure Newspaper Syndicate

"Zeke!" said Maggie. "Zeke! I'll do it!"

"Uh huh," Zeke mumbled into the seed catalogue.

There's my turkey money; if that isn't enough, I'll use some of the egg money."

"Uh huh, said Zeke. He eyed the half-page illustration of a tomato, more racy and luscious than anything ever before brought to maturity with printer's ink.

"I never realized it was so bad, I guess. The magazines are sure wonderful these days."

"Sure are," agreed Zeke absently. "Why, this picture might have been taken in this very room! It almost makes me blush. I guess I've always been too busy to keep up on good taste."

"Yeah," said Zeke.

"Let's see, I'd better do some measuring first. Then we can go to town and get some estimates." Maggie started out the window.

The old clock ticked industriously in the silence of the winter afternoon. Started, Zeke laid down the seed catalogue and looked at Maggie. There was a glint in her eyes. "Maybe I could get it all done by spring vacation when Joyce and Donald come home. Five weeks. Oh, yes, that ought to be time enough."

"Get what done?" asked Zeke. The seed catalogue slid to the floor unnoticed. It wasn't so much the nonsense she was babbling as the look on her face. Like the simple souls at revival meetings on the street corners in town Saturday nights.

"Painting and papering, new drapes, pictures—everything!" said Maggie, still in her trance.

"It's kinda early for housecleaning," Zeke ventured cautiously. It couldn't be cabin fever, could it? They hadn't been snowed in this year; they'd been to town, and to the movies, and to church. And they had plenty of magazines too, although Maggie's eyes weren't so good as they used to be. But with all the children gone . . .

Maggie laughed, and her laughter had a richness in it. She usually chuckled, or merely crinkled her eyes at a joke. She'd always been too busy cooking or washing or mending to laugh much.

"Don't look so scared," she said. "I'm not cuckoo, even if I do sound like it. I'm going to do over the living room. Redecorate it. Like the illustration in this magazine. See, this picture is 'before' and this one 'after'. Why, our house must look antique!"

"Going in for some style, huh?" Zeke was relieved and pleased. A new interest, that's what Maggie

needed, to give her some of the old sparkle.

"See, this room is a dead-ringer for our living room," said Maggie. "The light woodwork, flowered wallpaper and plain carpet clear to the walls. This old maple rocking chair. The cretonne covers on the sofa and chairs. These old-fashioned tie-back curtains. And that corner cupboard!"

"Uh huh, said Zeke, peering at the magazine. "I always kinda liked this room, myself, but fix it any way you want to."

Maggie spent money gleefully. She bought nice sensible brown paint for the woodwork and the floor, where the new rug wouldn't reach. The rug was green with a lot of rust-colored gewgaws. The new drapes were stiff and green. With them came fancy panel curtains.

"The sofa and chairs are all right," said Maggie. We'll just take off the cretonne covers and put on some fancy dollies. The upholstery is good as new."

"Kinda dark," mumbled Zeke.

"But rich," said Maggie with authority. "I'm glad I found out a little about interior decorating."

Maggie chose plain henna wall paper. "Dignified, and yet colorful," she labeled it.

Zeke painted and papered, pushed furniture about and laid the rug. Maggie took down the row of silhouette pictures over the sofa and replaced them with a large framed bowl of fruit. The new curtains shut out the sunshine, but Maggie sang as she put on the finishing touches—the fringed covers at jaunty angles on the piano and library table; the dollies on the chair and sofa backs.

"It sure does change things," Zeke sighed. Maggie smiled happily.

Zeke went to the station to bring the two youngest of the brood, Joyce and Donald, home for spring vacation. As they rumbled along over the thawing roads, Zeke cleared his throat.

"There's been some changes since you was home," he said by way of introduction. "Your ma has done over the living room. Copied it after a picture in a magazine. I want you to say you like it whether you do or not."

Donald's mouth dropped open, and Joyce started to say something, but Zeke went on. "The way I figure it, it ain't so much what it looks like, as what it's done. Your ma has a new permanent wave, and some new clothes. She looks pretty classy. She's head of the Red Cross unit here, and she belongs to that Study Club in town your Aunt Helen's been trying to get her to join all these years. She feels, she says, that the home gives her a background."

"But what—" Joyce began.

"Anyway," went on Zeke. "It looks like these darned interior decorators'd make up their minds about what's stylish and what's not, instead of going around in circles every thirty years."

"Well, what's the matter?" Donald demanded.

"It's like this," Zeke explained. "Your mother's eyesight ain't so good as it used to be. She got them 'before' and 'after' pictures mixed up. And changed the room from good to bad!"

Got His Man

Ex-Mountie Of Edmonton Gets A German Sniper

The Mountie, in this case too, got his man.

Tom Lowe, Edmonton, was a Mountie before he enlisted in the army. When the Cape Breton Highlanders went into action in the Adriatic offensive, he commanded one of their companies as a major.

A German sniper shot one of his men and Lowe forgot everything but the idea of getting the sniper. For two long hours he lay in wait, watching the bit of ground he knew concealed his prey. For two hours the German lay still. Then he made a move—and the Mountie got his man.

Major Lowe was later wounded by a shell.

Short-Wave Radio

Canada's Link With Europe Will Be Ready By First Of January

Canada's first short-wave radio link with Europe is almost forged, and by Jan. 1, 1945, should be on the air 18 hours a day. Dr. Augustin Frigon, general manager of the Canadian Broadcasting Corporation, announced.

Dr. Frigon said the new station, now under construction at Sackville, N.B., will ultimately be the most efficient short-wave transmitter in North America. The first beam will go on the air on an experimental basis in December.

It has been estimated that the millionaires of the world have increased 600 per cent. since 1923.

Energy From The Sun

Converter Capable Of Melting Iron Invented In Russia

A new type of solar energy converter capable of melting iron has been developed by the refugee Spanish scientist Federico Molero, who is carrying on experimental work in Tashkent, capital of Soviet Uzbekistan.

In an article published in the Moscow News, Molero describes his energy converter as a "paraboloidal mirror, 33 feet in diameter," mounted on light metal framework resembling the wings of an airplane. He states that the reflector surface is made of ordinary window glass, bent into the desired shape without pre-heating.

According to Molero, his device can produce hot water "in quantities measurable by the thousands of kilograms hourly" or "superheated steam at a temperature of 470 degrees centigrade," which is hot enough to melt a number of metals, including iron.

Because of the fact that the solar converter is unable to operate in cloudy weather, Molero says that his new machine will be best suited for use in branches of economy "where energy consumption coincides with energy production."

His machine could be used, for example, to drive steam engines to pump water for irrigation purposes. Molero suggests that his machine may thus be potentially capable of promoting cattle raising in the arid regions of Central Asia. He also thinks it could be used for refrigeration, or for conditioning the same area where need for such service is the greatest during the sunny period of the year.

FINE FOR CHILDREN

The last few months of the German occupation of Belgium provided children with new playgrounds—the fine concrete highways over which German transport moved. Belgian kiddies used them for roller skating.

Flowers In The Home

Start Care Now Of Your Winter House Plants

One of the secrets of success in keeping house plants in good condition during the winter is to start their care immediately the heat is turned on in the home in the fall. The reason is that one of the most common causes of failure during the winter is that the plants are kept in rooms that are much too warm for them. By the time Christmas has arrived, the plants may be wilted or otherwise in poor condition, particularly if they have been placed near a radiator. More house plants have been killed by heat than by cold. The ideal temperature for house plants is about 65 degrees, or better still, 60 to 65 degrees F. Three degrees less than the recommended house temperature both from the health point of view and that of the war fuel-saving campaign. If one desires to have the plants in any of these rooms, the best thing to do is to keep the rooms as cool as possible consistent with personal comfort.

The various plants have different tolerances to sunlight. Ferns should be placed where there is an abundance of light but not in direct sunlight, while, on the other hand, flowering plants as a rule require all the sunlight they can get, especially in winter time. Foliage plants are more tolerant to insufficient light, but in winter time they may be placed in direct sunlight.

Care should be taken to prevent direct draughts on plants. At the same time, a dry atmosphere is to be avoided because it not only stunts the plants but helps the increase of certain insect pests, such as red spider and thrips. Moisture in the air around the plants may be increased by standing the pots in shallow trays filled with pebbles, gravel, or moss and keeping it moist. Drainage in the pots is an important factor. This may best be arranged by using soil in the pot that will allow both air and water to pass through easily. A mixture of two parts good garden loam soil, one part rotted manure, and one part sand will generally fulfill the soil requirements of potted plants. Further drainage may be obtained by placing pebbles, small stones or like material at the bottom of the pot, so as to drain off any excess water.

Scientists say that when the barometer is falling, husbands and wives quarrel more, and children become more unruly.

Graduate Scholarships

Training Research Personnel Is Necessary For Canada

Establishment of a large number of graduate scholarships to develop highly-trained research personnel is imperative if Canada is to be enabled to hold her place in the post-war world.

It is not fair nor is it efficient that the men doing important basic scientific work should have to go cap-in-hand to individuals or organizations seeking funds with which to obtain apparatus and facilities.

There is need of a generous attitude by industry.—Royal Bank Letter.

British Lancasters

Carrying Capacity About Double Of Any Other Machine

British Lancaster bombers, powered by four Rolls Royce Merlin engines, whose bomb carrying capacity is approximately double that of any other machine in the world, are already flying freight across the Atlantic. Easily convertible to carry from 30 to 50 passengers, their long range and high speed will make them civil airliners with performance second to none immediately the war is ended.—British Information.

HAD SOME JOURNEY

On Oct. 5 a Christmas parcel, mailed to Tpr. John McDonald of Chamcook, N.B., overseas, on Nov. 1, 1943, finally found its addressee at Chamcook. The parcel went overseas, followed Tpr. McDonald all around England, followed him from coast to coast in France when he was assigned to a mosquito boat, back to England where he was invalided last spring, and finally back to Canada where he has been repatriated.

SELECTED RECIPES

BAKED MACARONI

1½ cups uncooked macaroni
1 medium-size onion
3 tablespoons Mazola
3 cups canned tomatoes
1 tablespoon corn syrup
1½ teaspoons salt
¾ teaspoon pepper
¾ lb sausage meat
¼ cup bread crumbs

Cook macaroni in 3 quarts boiling water to which has been added 3 teaspoons salt; drain and rinse. Cook onion in Mazola until golden brown; add tomatoes, corn syrup, salt and pepper; simmer 15 minutes. Shape sausage meat into six flat cakes; place half the macaroni in 1½ qt. casserole oiled with Mazola; cover with sausage patties; add remaining macaroni. Pour on tomato mixture; sprinkle with soft bread crumbs. Bake in moderate oven. Serves six.

More and more homemakers are seeing the economy of leaving crackers on the table through all pre-dessert courses. By economy, I mean saving butter—one of the rationed foods. Many housewives have been reduced to serving tiny slivers of butter in contrast to their generous pre-war pats in order to balance the ration coupon budget. But even a slim pat is sufficient for several crackers. In fact, the texture and salty flavor of the crackers make them delicious without any butter at all!

SLATE QUARRIES BUSY

Flying bombs which tore the roofs off thousands of houses in London and other parts of Southern England, have brought renewed prosperity to the slate quarries of North Wales. Quarries are working full time providing slates for repairs.

The fixed remuneration attached to the honor of being England's poet laureate is about \$515 a year.

His future is in your hands!

We at home don't have to give our lives, limbs, or health, or even give up our jobs. All we're asked to do is to lend our money for the seventh time. And we'd still do it if it were the seventeenth

time; because we know deep down that the future happiness of our children is without price. So, let's go all out again and put this Seventh—and maybe the last—over the top!

● That old saying, so well known to farm folks: "Plow to the end of the furrow" . . . so aptly makes our duty plain. And the end of the furrow is beyond the horizon.

Our men on the fighting fronts have weary, trying days ahead of them. We, on the home front, must not waver nor falter. Our duty is clear, we must keep faith with our fighters. On Canadian farms we must maintain our efforts to produce the foods our fighters and our allies need. That work will reward us with increased incomes.

And we must save . . . to have money to lend to our country to pay the increased costs that this war continues to pile up.

Money invested in Victory Bonds will help to buy the tools of war. They don't last long in action. They must be replaced. It's our job . . . the home front job . . . to see to it that our fighting men have everything they need.

Victory Bonds yield a double harvest. They provide our country with money to carry on the war. Later, they will provide money to buy things we will want and need, and which we have done without during the war. Victory Bonds will provide cash to pay for improvements for farm and home . . . new buildings . . . new machinery . . . better stock . . . new car . . . furnishings and conveniences for the home.

FARMERS!
WILL
YOU HELP
THIS WINTER?

If you are not required on the farm this winter you should take other work.

Extra winter workers are needed for woods operations—logging and pulpwood and fuel cutting—base metal mines, coal mines, meat packing and cold storage, grain handling, railway track maintenance, iron foundries and other high priority occupations, varying with the area.

Please offer your services to:

The nearest Employment and
Selective Service Office; or

The nearest Provincial Agricultural Representative; or

Your Local Farm Production
Committee.

A good response to this appeal is important to Canada's welfare—please act immediately.

Postponement of Military Training continues while in approved essential work off the farm.

NATIONAL SELECTIVE SERVICE

DEPARTMENT OF LABOUR

HUMPHREY MITCHELL A. MacNAMARA
Minister of Labour Director, National Selective Service

This advertisement is issued by the Dominion Department of Labour in aid of the Dominion-Provincial Farm Labour Programme.
